Listing of Claims

Claims 1-10 (canceled)

Claim 11 (currently amended): A water-soluble, native dry extract consisting essentially of Ginkgo biloba plant part constituents, wherein the extract is produced by ultrafiltration using a filter having an average pore-size molecular weight cut off ranging from 2000 to 10000 Daltons and wherein the extract lacks any solubilization agents.

Claim 12 (previously presented): The dry extract of claim 11, wherein the plant part constituents comprise Ginkgo biloba leaves.

Claim 13 (previously presented): The dry extract of claim 12, wherein the plant part constituents comprise terpenlactones and flavonglycosides, a higher percentage content of terpenlactones and flavonglycosides being present in the extract as compared to the Ginkgo biloba leaves from which the extract is extracted.

Claim 14 (currently amended): The dry extract of claim 11, wherein the extract is a dried primary raw extract.

Claim 15 (currently amended): The dry extract of claim 11, wherein the extract is a partially purified dry extract partially purified by removal of extraction solvents prior to the ultrafiltration ~~in comparison with a raw extract, specifically the partially purified dry extract being freed of extraction solvents and constituents cold-precipitated in aqueous solution.~~

Claim 16 (currently amended): The dry extract of claim 15 ~~11~~, wherein the dry extract is ~~largely purified in comparison with a raw extract, specifically the largely purified dry extract being freed~~

~~being freed of extraction solvents, of constituents cold precipitated in aqueous solution, and of undesired contents that can be separated out via precipitation reactions, subjected prior to the ultrafiltration to~~ adsorption and desorption processes and, extraction with n-butanol-type purification procedures.

Claim 17 (previously presented): The dry extract of claim 11 comprising a content of:

- at least 20 % flavonglycosides by mass,
- at least 5 % terpenlactones by mass, and
- at most 5 parts per million (ppm) ginkgolic acids.

Claim 18 (previously presented): The dry extract of claim 11 comprising a content of:

- at least 22 - 27 % flavonglycosides by mass,
- at least 5 - 7 % terpenlactones by mass,
- at least 2.8 - 3.4 % ginkgolides A, B, C by mass,
- at least 2.6 - 3.2 % bilobalide by mass, and
- at most 5 ppm of ginkgolic acids.

Claims 19 to 24 (canceled).

Claim 25 (withdrawn): The dry extract as recited in claim 11, wherein the extract does not have a galenic aid.

Claim 26 (canceled).

Claim 27 (canceled).
